the teachers are very helpful, the staff is very accomidating,and everyone in the college does their best to help eachother

math instructor always available relatively inexpensive friendly atmosphere

By letting me get my degree for what i want to go into and having all the classes i need for it instead of transferring out to another college. Not being able to make a better person out of myself if i didnt have a college that helped me out so much.

It has helped me learn that coming to class is crucial, I can ask anyone for help, and there's always support.

making me feel welcome good service when needed it awsome staff

My instructor, Leslie Peltier is very helpful, and lets us know she is there if we need anything. I am an older

student, but never was made to feel different from younger students.
 Instructors are very good Class size is easy to learn in Student services helps

if there was actually a person to go to help you pick courses to take that will help you get to your goal job, other than that there is nothing more i can really say about this subject

nothing, it was all good

more information about how to get started better themselves to help us sign up for classes beter organization of some things

More online courses More 4ye degree courses here

Discuss more things i could do with my future. Make more activities that push us toward out goals.

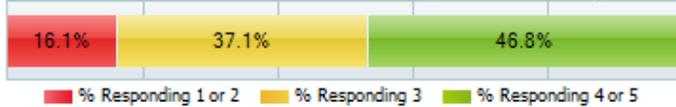

Not Sure

I don't think I would change anything

They can help me improve by letting me know what jobs I can take when i graduated, they can help me with visual aide when i need help, and they can help me try to graduate.

QQ18. What challenge or difficulty have you encountered in your first year that you did not expect? (open ended question) (N=51)

Answer

5

the times the classes are at and the importance of studying

time management

My first year challenge was conquering my first online class on Jenzabar. I have since then found it to be a great program and an enjoy the challenge of taking online classes.

nothing really I really like all the classes i been taken and are taken now! they r pretty easy

Financial difficulty

jenzabar was difficult for me

When I first enrolled we had orientation where we did the placement testing.... On the math part of the testing I did the basic addition, subtraction, multiplication and division that's it, none of the fractions or anything, and it placed me in Algebra 1. I dropped that first thing and took the basic intro to math, and received a B in the class this semester I took Intro to Algebra and had to drop right before mid term, because I just couldn't catch on. I

OQ20. Would you like to see more courses offered online? If so what courses? (N=47)

Answer
im not interested in on-line coarses, hands on person to person teaching is better in my perspective.
I would like to see chemistry and physics online
I would definitely like to see more classes offered online, that being said, I have taken a lot of humanities classes on line as well as Introduction to Psychology, but I don't know what other classes I would like to see. I guess whatever there is more of a demand for, is what classes should be provided.
Yes, But i dont know which ones haha just more online classes for Health Information Management
idk
no, I tried to do an online course and just couldn't get it.
NO I personally think on-line classes are for the birds. People generally cheat even with the math classes other people do the work for them...so what are they learning? and what kind of people are you giving degree to???
Yes, I have no idea what classes, but I'm liking the online classes better.
